CLOUDCOIN FINANCE

About us

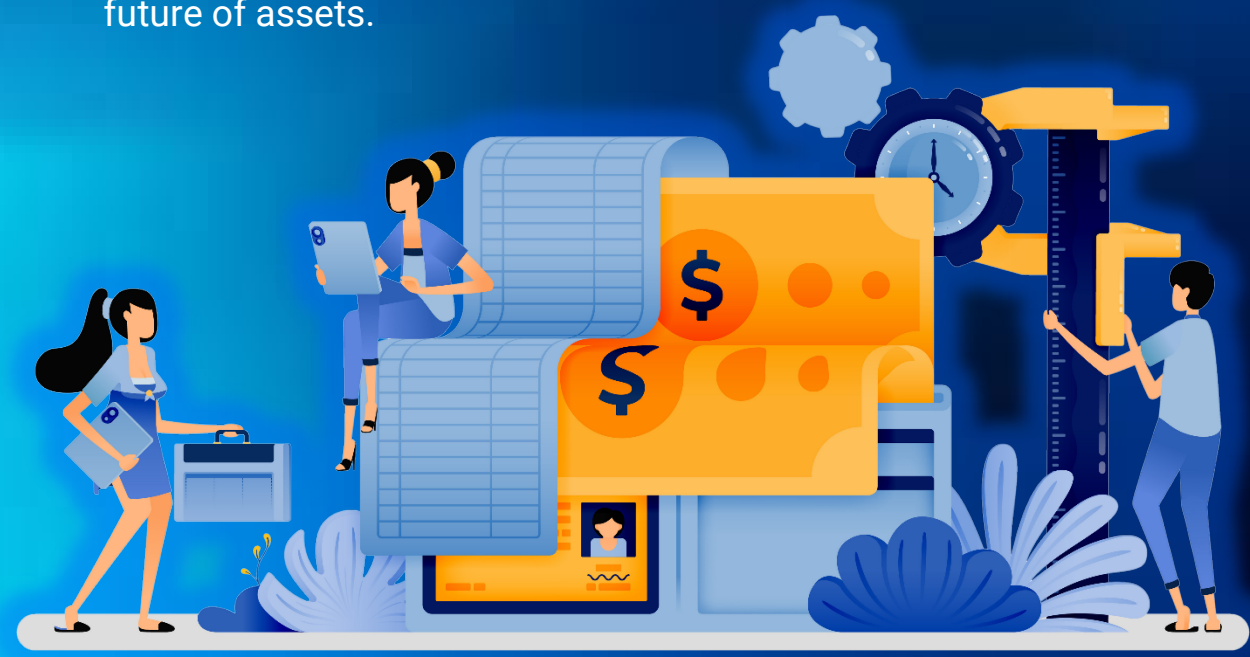
- CloudCoin Finance was developed out of cloud technology. In 2021 the CCFI token was established through a hard fork on the Binance Smart Chain.
- The CCFI token serves as the ideal bridge to cloud technology in the world of decentralized finance.
- The DeFi project CCFI is owned by technology provider RAIDAPAY Ltd (2018).
- The CCFI token was created to bring cloud technology and decentralized blockchain technology together in decentralized finance. It serves as a utility token in the DeFi world, providing useful and practical applications to enhance the capabilities of decentralized finance.
- The CCFI token is a tradeable asset that leverages cross-chain and multi-chain technology to transform the decentralized financial world.

ECO FRIENDLY

FINANCIAL SOLUTION TO YOUR BENEFITS

BINANCE SMART CHAIN

The DeFi token CCFI is a milestone on the path to the future of assets.



Exchange your digital assets

Transfers of your financial assets will be made possible multi-chain and cross-chain through the provided cryptocurrency exchanges.

Functionality

The technology provider RAIDAPAY Ltd. was founded in 2018.

The CCFI Token is integrated into the RaidaPay App as a payment system and uses all functions.

Fast & flexible

The RAIDAPAY app is an open source program.

A multi-functional app in alpha version.

Cost-effective

The interoperability of multiple blockchain technologies, known as "bridges," provides the low-cost transaction capability.

Security

The cloud- and blockchain technology make the app safe and recoverable.

Functional

- Live Trading
- Trading BOT
- Live Watchlist
- Live Exchange
- Staking
- Farming
- Lending
- Wallet System
- Referral System
- KYC
- Bridges
- Peer 2 peer (payments)

Why choose CCFI Token in 2023

CCFI DeFi token functionalities

DeFi with CCFI

DeFi is an alternative decentralized financial system based on blockchain technology

Fees charged by banks and other financial institutions are eliminated by a DeFi protocol

CCFI holders put their digital assets into a DeFi smart contract to generate more CCFI

Sablier.Finance uses real-time smart contracts to stream token on dApp. Users transact on the blockchain instantly by vesting tokens and connecting their wallet. The protocol streams tokens to CCFI holders, providing sustainable and efficient financial services.

Your CCFI tokens are vested instantly into your Wallet to protect the project, prevent dumping or manipulatory actions and to protect all holders from loosing value.

Sablier is a token streaming protocol available on Ethereum, Optimism, Arbitrum, Polygon, Ronin, Avalanche, and BSC

STAKING

In staking your assets generate more tokens for a certain period of time in different DeFi setups. CCFI is generating rewards paid in CCFI token on the NULS.io blockchain by staking NULS coins having an 14% APY. Through this DeFi protocol a natural demand of CCFI token is created.

FARMING

Yield farming is a DeFi smart contract where the holders of digital assets can participate in a farming-pool together with other holders to earn DeFi rewards, by lending the pool your assets in the smart contract via NULS Coin.

RaidaPay dApp is coming 2023 and has farming features integrated protocols.

DAO

The biggest advantage of a DAO (Decentralized Autonomous Organization) is the transparency and collective, decentralized governance of an enterprise, and suitable for DeFi CCFIToken.com

Pre-Sale

CCFI Token #CCFI

Buy CCFI Token in the limited pre-sale directly to your decentralized wallet: MetaMask and Trust Wallet.

Buy **CCFI Token** through the **RaidaPay App** soon

(**Download**: www.CCFiToken.com)

Hodl or Trade

CCFI Token #CCFI

Hold your assets and watch them grow or use your assets for staking, farming and trading with our applications to produce more utility tokens.

Monitor your Assets

Do you want to monitor the development of your assets? You can do this on various available blockchain service providers.

CCFI Token Exchange

Starting in april 2023 you will be able to trade your assets on specified blockchain exchanges.

CLOUDCOIN FINANCE

Blockchain Partners

The CCFI Token is used for staking and farming.

These features are in an early stage of development.

If you are ready to begin staking your NULS, access this link:

https://www.coingecko.com/en/coins/nuls

Currently, there is an opportunity for NULS holders to stake a minimum of 100 NULS and earn staking rewards in CCFI - APY 14%.

Earn CCFI rewards by using this link and connecting your NULS wallet, which can be created here.

The staking and farming reward pool for CCFI Token is limited to 18% of the total supply.

CCFI Token is a proud member of the NULS.io SCO platform

Connect your wallet

An example based on the NERVE Bridge network

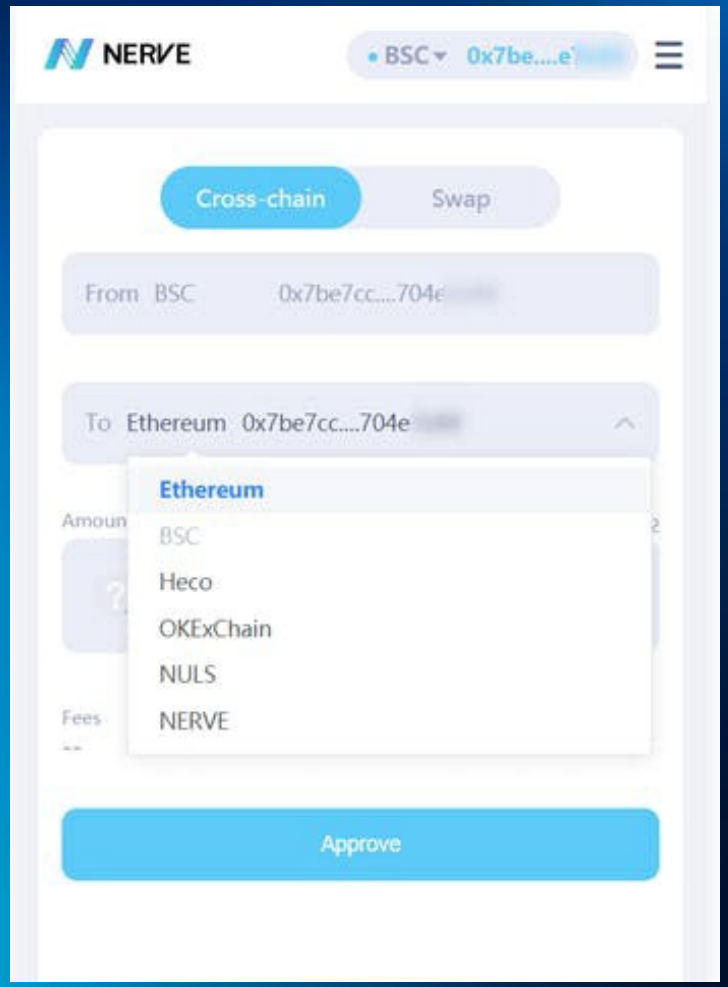
To transfer your tokens from one chain to another, please visit https://bridge.nerve.network. Connect with your MetaMask and select CCFI from the list of currencies. Only gas fees are required for this process.

BSC	ETH	CCFI Fees 10000	0.26 BNB
BSC	ETH	CCFI Fees 100000	0.31 BNB
BSC	ETH	CCFI Fees 1000000	0.33 BNB
BSC	ETH	CCFI Fees 10000000	0.35 BNB

From BSC to HECO # From BSC to OKEx # From BSC to NULS # From BSC to NERVE

More explanations on the fees of the exchanges can be found in the presentation of the bridge and integration exchanges.

The ETH blockchain has high but dynamic fees, making it a valuable integration. Other networks such as HECO, OKEx, NULS and NERVE also have dynamic fees, but they tend to be lower compared to ETH. Further integrations will follow.



NERVE is a decentralized digital bridge, staking and farming network.

It provides instant transaction capabilities through its own NERVE network to the DeFi ecosystem.
